

## AMENDMENTS TO THE SPECIFICATION

Paragraph number notations refer to Applicant's published patent application US 2004/0215152 A1.

Please replace paragraph [0001] with the following amended paragraph:

[0001] This application is a continuation of International Patent Application No. PCT/CH02/00413, filed on Jul. 22, 2002, which claims priority to German Application No. 101 63 328.9, filed on Dec. 21, 2001 and German Application No. 201 12 501.3, filed on Jul. 30, 2001, the contents of both are incorporated herein by reference in their entirety.

Please replace paragraph [0054] with the following amended paragraph:

[0054] A plurality of components select the product dosage and activate the administering apparatus. These include the dosage setting member 9, the piston rod 4 and the blocking device 8. Further included is a dosing and activating device, itself comprising a plurality of components. The dosing and activating device comprises the dosing and activating element 12 and a counting and indicating means 17. The counting and indicating means 17 counts and optically indicates the selected product dosage. Of course, the dosage may be indicated by the counting and indicating means 17 in a manner other than optically, for example audibly. While the reservoir module 10 is designed as a disposable module, the dosing and activating module 30 is intended for repeated use.
